

Home Performance with ENERGY STAR® Rebate Fact Sheet

Home Criteria	Primary Improvements
Homes with Central Air Conditioning or Through the Wall Units	50% of costs up to \$3,000 for the following Primary Measures: <ol style="list-style-type: none"> 1. Insulation 2. Air Sealing 3. Duct Sealing 4. Duct Insulation 75% customer rebate up to \$400 , for installation of one new ventilation system or repair or upgrade of multiple existing venting systems (MUST BE conducted in association with air/duct sealing and/or insulation upgrades) †
	Supplemental Improvements
	\$35 per replacement window \$10 per replacement storm door or window \$25 toward the installed cost for each qualified wall mounted room air conditioner \$150 of the installed cost for electric domestic hot water heater replacements \$50 towards the installed cost for each knob & tube wiring upgrade \$50 towards measures to provide sufficient combustion air for Combustion Appliance Zones

To qualify for rebates improvements must be evaluated through a Comprehensive Home Audit and installed by a Home Performance with ENERGY STAR program participating contractor.

\$3,000 cap includes both primary and supplemental improvements. Homeowners can expect to receive payment in about 8 to 10 weeks after the receipt of all completed paperwork.

† Exhaust fans can cost approximately \$350-\$650 installed. Connecting an existing exhaust fan to the outdoors may cost approximately \$150-\$200. If piping exhaust fans to the outdoors is recommended as part of a Comprehensive Home Audit – the piping must be installed prior to performing follow-on work.
