DEC Region # 1 County: Suffolk Lead Agency: Long Island Power Authority

Project Title: Southampton to Bridgehampton Transmission Line and Expansion of Bridgehampton Substation

Brief Project Description: The action involves installing a new 69 kilovolt electric transmission line from the Southampton Substation to the Bridgehampton Substation. Four routes were analyzed. One would use the existing easements between the two substations. The second would transverse various existing roadways along the most direct route between the two substations. The third would use the Long Island Rail Road Montauk line right-of-way to Bridgehampton Sag Harbor Turnpike. The last would follow Montauk Highway to Bridgehampton Sag Harbor Turnpike. The transmission line could be above ground, under ground or a combination of both for any of the routes, except the existing easements, which would be all under ground. In addition, the Bridgehampton Substation would be expanded at a LIPA-owned site adjacent to the existing Bridgehampton Substation. The Draft Environmental Impact Statement is available on the LIPA website at [www.lipower.org](http://www.lipower.org) under the *About LIPA, Powering LI* tab.

Project Location (include street address/municipality): North Sea Road to Bridgehampton Sag Harbor Turnpike, Southampton

Contact Person: Michael D. Hervey

Address: 333 Earle Ovington Boulevard, Suite 403 City: Uniondale State: NY Zip: 11553
