LIPA's Commercial Efficiency Program

Get rebates up to \$100,000 per project plus BIG annual energy savings when you replace existing lighting and HVAC systems with energy-efficient models!

Lighting and cooling make up more than 20% of the total energy costs for most businesses. Changing to pre-qualified energy-efficient lighting systems and unitary or split HVAC systems can significantly reduce your annual electric costs.

LIPA offers rebates to help your business offset the cost of our pre-qualified energy-efficient lighting or cooling systems. Rebates are also available for chillers, compressors and motors.*

Choose equipment from LIPA's pre-qualified list:

- Annual rebates up to \$100,000 per project.
- Annual rebates up to \$300,000 per LIPA customer for multiple projects in the same calendar year.

**For rebate applications over \$10,000, you must contact LIPA prior to starting the project.*

Need a
customized
energy-
saving, cost-
saving, energy
efficiency plan?

LIPA can help.

We'll provide you with technical assistance to help you plan an energy-savings program for your facility. For complex projects, LIPA may cover 50% of technical assistance costs, up to \$50,000. Almost any electric-saving measure or technology, not already listed on our pre-qualified equipment list, may qualify.

Rebates up to \$200,000 per project.

LIPA rebates are available to help offset the costs of your customized energy efficiency project. To take advantage of these rebates, you must contact LIPA prior to starting your project or purchasing any new equipment.

Develop a customized energy-efficiency plan with LIPA:

- Annual rebates up to \$200,000 per custom project.
- A maximum of \$600,000 in rebates are available for multiple custom projects in the same calendar year.
