

Need More Options For Your Business?

Being competitive in today's business market means making the best choices for your business. Whether you are a small, medium or large business, LIPA offers different electric rates specific to your business needs so you can operate your business more efficiently.

Below are some examples of the rates we offer our business community:

Time of Use Rates – Does your business operate in the early hours before 10:00AM or do you have the flexibility to shift your hours of operation to after 10:00PM? If your answer to either question is yes, LIPA's Time of Use rate may be a good option for you. If you can move the majority of your usage to the "off peak" period between 10:00PM and 10:00AM Monday through Friday, and all day Saturday and Sunday, you can lower your costs by as much as half. These rates are available to all businesses, regardless of size.

Small Business Rates – Many business customers, such as card shops and insurance agencies with small electric use (less than 2,000 kWh a month) fall into this rate category.

Mid-Size Business Rates– More energy intensive business customers such as delicatessens and salons fall into this rate category. These customers must use more than 2,000 kWh per month, and have a demand use of 7.5kW or more to qualify.

Large Business Rates –This rate is set aside for our largest business customers such as supermarkets and large retailers. These customers have a demand use of 145kW or more each month.

Seasonal Rates – Is your business on the beach or on the water? Do you only operate during the summer? Then LIPA's seasonal rate is the one for you. You qualify for the seasonal rates as long as you discontinue your service for four continuous months between October 1 and May 31.

To maximize your business performance, learn more about our rates at www.lipower.org. While on our site, explore the other service options that LIPA provides to businesses, such as energy efficiency incentives and balanced billing and payment options.
