

# Stay Cool and Stay on Budget

Don't let summer cooling costs disrupt your cash flow. LIPA can help with our free Commercial Balanced Billing program.

By dividing your annual usage into balanced, monthly payments, this program spreads typically higher seasonal costs over the year.

Your payment amount can change, for example, if your usage significantly changes. But over the course of a year, you will always pay only for the actual amount of electricity you have used – no more, no less.

To enroll in Commercial Balanced Billing, call our Business Call Center at **1-800-966-4818**.
