Comment:

Hi,

Just wanted to make some comments about Proposed Time-of-Day Rates.

- 1) It should be configured so that you have to opt in not opt out.
- 2) I foresee that low-income residents on a hot summer day will have to choose between running the AC to stay cool or not run it due to high cost and risk their health and safety. This could lead to loss of life if they cannot afford TOD rates.

Thank you.
