Erik Engquist

Comment:

I am encouraged that LIPA is switching to time of day pricing as the default. I have an electric vehicle that I charge at night. But I also have solar panels, and because of them, LIPA tells me it would cost me hundreds of dollars more per year to switch to time of day pricing. I still do not understand why this is the case, but I am concerned that this change in 2024 will cost me money.
