Fitch Rates LIPA Electric System Rev Bonds 'A'; Outlook Positive

Mon 24 Jul, 2023 - 12:09 PM ET

Fitch Ratings - New York - 24 Jul 2023: Fitch Ratings has assigned an 'A' rating to the following Long Island Power Authority, NY (LIPA or the authority) bonds:

--Approximately $400 million electric system general revenue bonds series 2023E;

--Approximately $185 million electric system general revenue bonds series 2023F;

--Approximately $128 million electric system variable-rate demand general revenue bonds series 2023D (underlying rating);

In addition, Fitch has assigned a 'A' bank bond rating to the series 2023D bonds. The bank bond rating is assigned to the 2023D bonds but will only become applicable if the bonds cannot be remarketed and are purchased by the bank providing the liquidity facility.

Proceeds from the series 2023E bonds will be used to fund system improvements and pay the costs of issuance. Proceeds from the series 2023F will be used to refinance existing debt and to pay the costs of issuance. The series 2023E bonds will be sold with a fixed rate and amortize through 2049. The series 2023F bonds will be sold with a fixed rate with various maturities through 2033. These bonds are expected to price the week of July 31st. The series 2023D bonds are expected to be remarketed in August.

Fitch has also affirmed the following LIPA ratings at 'A':

--Issuer Default Rating (IDR);

--Approximately $4.5 billion senior-lien electric system revenue and refunding bonds.

The Rating Outlook is Positive.
The Positive Outlook reflects LIPA's improving leverage ratio and Fitch's expectation that the gradual but consistent deleveraging trend that began in 2015 will continue through 2027. Leverage, measured by net adjusted debt-to-adjusted funds available for debt service (FADS), improved to 8.1x at YE 2022 from 8.8x four years prior. The improvement is attributable, in part, to LIPA's strategy of budgeting to achieve higher fixed obligation coverage.

Going forward, leverage ratios are expected to trend below 8.0x in 2023/2024, consistent with a higher rating, as performance continues to benefit from LIPA's revenue-decoupling mechanism (RDM), as well as modest but consistent rate increases designed to achieve higher fixed charge coverage.

LIPA's very strong service area, more disciplined approach to rate setting and authorized RDM should sustain its very strong revenue defensibility and overall performance even through periods of stress, further supporting its financial profile. LIPA's operating cost burden remains comparatively high within the sector. However, ongoing efforts to moderate costs and operating risk, and improve the terms of its operating services agreement (OSA) with system operator PSEG Long Island (PSEGLI), have been reasonably successful in recent years, and are factored in the rating.

The adoption of a public power model, whereby LIPA would directly operate the system upon termination of the OSA in 2025, is still under consideration. An upgrade of the rating
is unlikely prior to a final decision related to management of the authority's assets, which is expected prior to the end of calendar 2023.

SECURITY

The series 2023D, 2023E and 2023F bonds are senior-lien obligations of LIPA secured by the net revenues of the electric system, after payment of O&M expenses.

KEY RATING DRIVERS

Revenue Defensibility - 'aa'

Very Strong and Mature Service Area

LIPA's revenue defensibility assessment reflects the revenue stability provided by its exclusive role as the transmission and distribution utility serving Long Island, and the exceptionally strong profile of the service area. The assessment also factors in LIPA's legal ability to determine rates, its ability to recover 80% of costs through rate mechanisms and offset variation in energy sales through a revenue-decoupling mechanism (RDM) that adjusts for any difference between actual and budgeted revenues, and its affordable cost of electric service.

Rate increases above 2.5% are subject to regulatory review by the New York State Department of Public Service. However, this is not viewed as a credit risk given LIPA's other adjustable rate mechanisms. The authority has not proposed a rate increase of more than 2.5% since the initial rate plan since 2015.

Operating Risk - 'bbb'

Above Average Operating Costs

Operating risk is assessed as midrange, reflecting operating costs that are well above the national average and have ranged between 15 and 20 cents/kWh over the last five years. LIPA's relatively high operating cost burden reflects legacy acquisition costs, challenges related to serving LIPA's island geography and high payments in lieu of taxes (PILOTs). Most recently, operating costs increased to 19.2 cents per kilowatt hour (kWh) in 2022 from 17.2 cents per kWh in 2021 as a result of rising natural gas prices and power supply costs.

LIPA's power supply portfolio is well diversified and comprised of purchased capacity from units located on Long Island and elsewhere. Natural gas is the predominant fuel source for
the vast majority of contracted capacity, supplemented by smaller amounts of nuclear, solar, hydro, oil-fired and refuse capacity. Capital spending is elevated at roughly $4.0 billion over the next five years.

Financial Profile - 'a'

Improved Cash Flow Supports Lower Leverage

Lower leverage of 8.1x and stable coverage of full obligations of 1.25x in 2022 reflect a series of base rate increases and the resulting improvement in FADS, together with increasing cash on hand. Unrestricted cash totaled $1.34 billion at the end of 2022, or 180 days. Liquidity facilities provide additional liquidity totaling 324 days on hand.

Fitch's scenario analysis indicates that leverage is expected to continue trending lower, declining below 8x in both the base and stress scenarios, which is consistent with the financial profile assessment and rating outlook. Liquidity is expected to remain robust and coverage in historical ranges. Fitch's key financial ratios and analysis includes consideration of LIPA's approximately $3.8 billion in outstanding securitization bonds.

Asymmetric Additional Risk Considerations

There are no asymmetric additional risk considerations factored in the rating.

RATING SENSITIVITIES

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

--Failure to achieve leverage approaching 7.0x in Fitch's base and stress cases would likely result in a revision of the Outlook to Stable;

--Failure to sustain leverage below 9.0x in Fitch's base or stress cases would likely result in a downgrade;

--Failure to implement planned rate increases;

--Higher than anticipated capex and related borrowings;

--A determination that any proposed change in the management of LIPA's assets introduces additional operating or financial risk.
Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

--A sustained reduction in leverage, approaching 7.0x in Fitch’s base and stress cases;

--A determination that any proposed change in the management of LIPA’s assets does not introduce additional operating or financial risk.

BEST/WORST CASE RATING SCENARIO

International scale credit ratings of Sovereigns, Public Finance and Infrastructure issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of three notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit https://www.fitchratings.com/site/re/10111579.

PROFILE

LIPA owns one of the largest municipal electric distribution systems in the U.S., serving about three million people located throughout New York’s Nassau and Suffolk counties and the Rockaway section of New York City. LIPA owns the electric transmission and distribution system located throughout its service territory. However, operation and maintenance of the system, and significant responsibilities for power supply are contracted for with external service providers.

LIPA and PSEG LI amended their existing OSA in April 2022 to place a greater share of PSEG LI’s compensation at risk based on performance, introduce a wider array of metrics to evaluate performance, strengthen accountability, facilitate long-term planning and separate systems dedicated to LIPA. The amendments further eliminated PSEG LI’s eight-year extension option leaving the termination date at Dec. 31, 2025.

A legislative commission is evaluating a model that would bring the utility’s transmission and distribution assets under Authority management upon expiration of the OSA. The commission issued a draft report in April 2023 laying out options and considerations for governance, regulatory oversight, transparency and resource planning. Additional hearings are scheduled for the fall and a final report, along with a draft bill, are expected to be

released in November 2023. LIPA believes that a transition could be completed in 12 months. If the model is not pursued, LIPA will rebid the OSA before YE 2023.

The majority of LIPA's generating capacity is provided pursuant to a power supply agreement (PSA) with National Grid plc (BBB-/Stable). The PSA, which extends through April 2028, provides LIPA with access to approximately 3,700MW of on-island generating capacity currently owned by National Grid. LIPA also maintains an ownership interest in the Nine Mile Point 2 (NMP2) nuclear facility. The remainder of LIPA's capacity and the majority of its energy supply are met through a portfolio of purchased power agreements, including off-island and market purchases. Power supply and fuel management services are provided by PSEG Energy Resources & Trade LLC, a PSEG affiliate.

**Sources of Information**

In addition to the sources of information identified in Fitch's applicable criteria specified below, this action was informed by information from Lumesis.

**REFERENCES FOR SUBSTANTIALLY MATERIAL SOURCE CITED AS KEY DRIVER OF RATING**

The principal sources of information used in the analysis are described in the Applicable Criteria.

**ESG CONSIDERATIONS**

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit [https://www.fitchratings.com/topics/esg/products#esg-relevance-scores](https://www.fitchratings.com/topics/esg/products#esg-relevance-scores).

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: https://www.fitchratings.com/understandingcreditratings. In addition, the following https://www.fitchratings.com/rating-definitions-document details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. ESMA and the FCA are required to publish historical default rates in a central repository in accordance with Articles 11(2) of Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 and The Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019 respectively.

Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at https://www.fitchratings.com/site/regulatory. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable
investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided “as is” without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents.
in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US$1,000 to US$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US$10,000 to US$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001. Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the “NRSRO”). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see https://www.fitchratings.com/site/regulatory), other credit rating subsidiaries are not listed on Form NRSRO (the “non-NRSROs”) and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

dv01, a Fitch Solutions company, and an affiliate of Fitch Ratings, may from time to time serve as loan data agent on certain structured finance transactions rated by Fitch Ratings.

SOLICITATION STATUS

The ratings above were solicited and assigned or maintained by Fitch at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

ENDORSEMENT POLICY

Fitch’s international credit ratings produced outside the EU or the UK, as the case may be, are endorsed for use by regulated entities within the EU or the UK, respectively, for regulatory purposes, pursuant to the terms of the EU CRA Regulation or the UK Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019, as the case may be. Fitch’s approach to endorsement in the EU and the UK can be found on Fitch’s Regulatory Affairs page on Fitch’s website. The endorsement status of international credit ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.
