

TOPICS FOR DISCUSSION

- **01 ERM** Process Overview
- 02 2023 Risk Summary
- **03** ERM Board Policy Review and Approval

ERM PROCESS OVERVIEW

Risk Reporting

Communication of risk information that enables management to make risk-informed decisions

Risk Monitoring

Process for monitoring changes in the probability and/or impact of a risk

Risk Response & Mitigation

Process and documentation of identifying and implementing actions to minimize the probability and/or impact of a risk

Risk Identification

Process to identify risks affecting the organization

Risk Assessment

Quantitative and qualitative methods utilized to assess the magnitude of risk exposures

RISK EVALUATION PROCESS & CRITERIA

Risk Identification

Work with subject matter experts within each department to identify the risks that could impact their objectives.

For example: A major event could cause damage to infrastructure, delayed restoration, and ineffective communication with customers which could result in increased costs and negative reputation

Risk Assessment

CRITERIA FOR EVALUATING RISKS								
Impact	Impact Categories	Likelihood	Velocity	Outlook				
5 - Severe	Financial	5 - Almost Certain	High	Increasing				
4 - Major	Reliability	4 - Likely	Medium	Decreasing				
3 - Moderate	Reputational	3 - Possible	Low	Stable				
2 - Minor	Regulatory, Legal, & Compliance	2 - Unlikely						
1 - Incidental	Environmental, Health, & Safety	1 - Highly Unlikely						

Work with subject matter experts to evaluate the likelihood, impact, velocity, and outlook of the risk

For example: Major Event risk has a severe (5) rating in multiple impact categories and is likely (4) to occur, so the risk exposure is 5x4=20

Risk Response & Mitigation

Work with subject matter experts to determine and develop mitigation actions to manage the risk.

Risk Monitoring

Develop a cadence and quantitative measures that monitor risk trending by working with subject matters in each department

Risk Reporting

Report on high-priority risks periodically to the Enterprise Risk Management Committee and quarterly to the Board of Trustees. Additionally, select risks have deep-dive analysis performed and presented to leadership which includes both LIPA and PSEG Long Island.

ERM ROLES AND RESPONSIBILITIES

Board of Trustees

CEO

Senior Leadership/VPs

Directors

Front-line Managers

Provides oversight of the ERM process

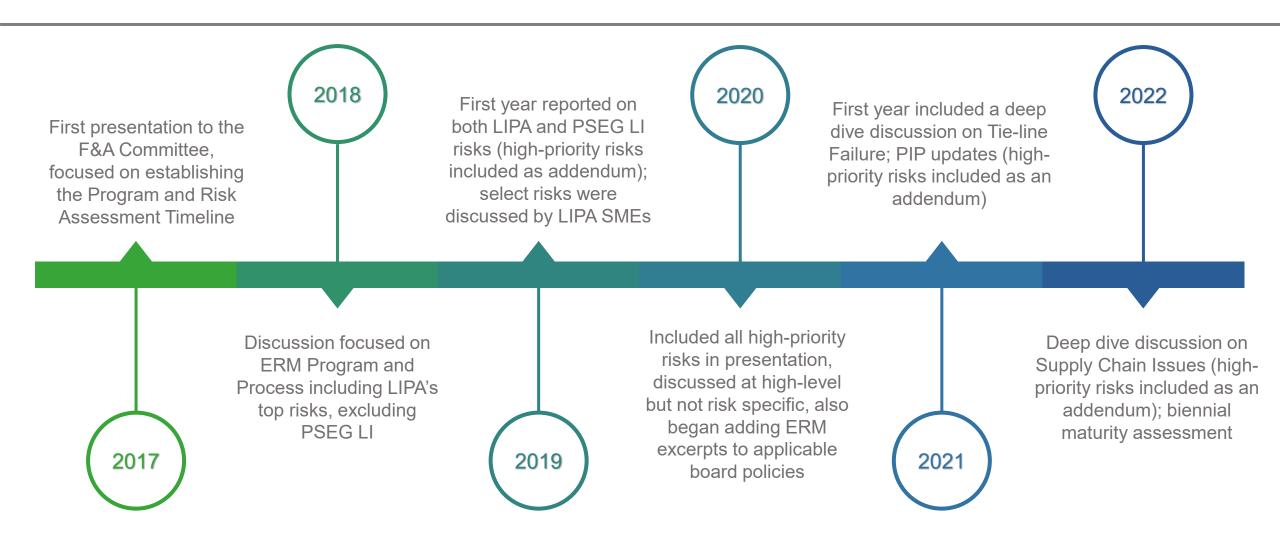

Reviews and approves overall risk portfolios

- Reviews and approves department portfolios
- Reviews and aggregates enterprise risks at ERMC meetings
- Prioritizes resources to reduce risk
- Responsible for managing department risks
- Identifies areas for improvement

Identifies and manages risks in day-to-day operations

ERM PRESENTATION TO F&A COMMITTEE - HISTORY

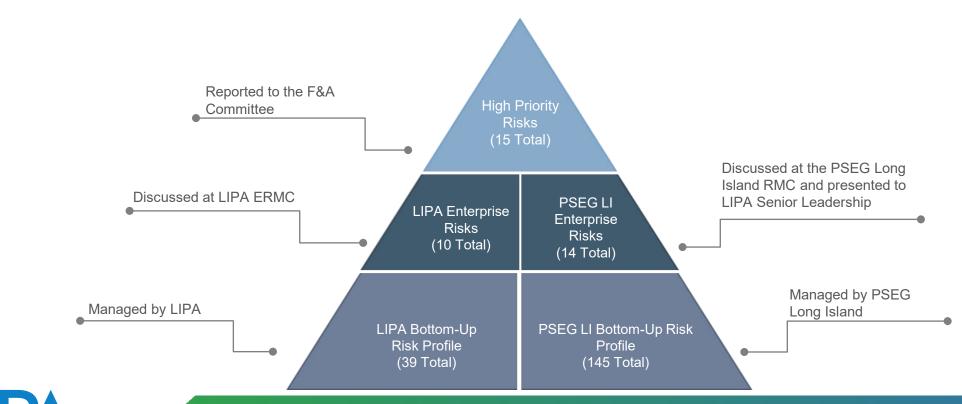

2023 SUMMARY OF RISKS

High-priority risks can significantly impede both LIPA and PSEG Long Island's ability to achieve their respective goals.

- Both LIPA and PSEG Long Island undergo a formal risk assessment process to develop their risk profiles; PSEG Long Island provides LIPA an
 in-depth annual report detailing their most significant risks and their mitigation actions
- There are 15 risks that have been deemed high-priority and represent the most significant risks to the organization; these risks along with their mitigation strategies and actions are reviewed and approved by senior management

Long Island Power Authority

2023 LIPA AND PSEG LONG ISLAND HIGH-PRIORITY RISKS

Category	Risk Risk
	Major Event - Damage to infrastructure, delayed restoration, and ineffective communication with customers could result in increased costs and negative reputation
Reliability	Physical Security Attack - Substation security and/or the control centers are compromised and could result in reduced reliability and/or a safety incident
	Outdated Primary Transmission Control Center - Current control center condition could create increased system vulnerabilities, especially during high activity events
	Safety - Employees/contractors not following procedures, equipment failure, or lack of adequate training could result in an injury/death
	Loss of multiple tie-lines - Multiple cable failures could result in the inability to meet demand and require load curtailment measures, including load shedding
	Cyber Event - Unauthorized access to IT and/or T&D systems could result in decreased operational abilities
Technology	Breach of Personal Identifiable Information - Internal or 3rd party mass breach of PII could result in loss of sensitive data, a critical system, and potential fraud
o,	Failure of Critical Business System - A major failure of availability or performance of a critical operating technology or business system, results in extended disruption to operations or business processes, damage to systems and/or loss of data
	Regulatory/Legislative - Modifications to regulations and/or legislations could result in potential changes to the business model, operational changes, and/or an increased cost of service
Pogulatom	Business Model - The outsourced business model could result in suboptimal value and increased cost to customers
Regulatory & Rates	Business Model Uncertainty - Uncertainty regarding the future business model results in enterprise-wide challenges related to attracting and retaining talent, competing priorities impact the ability to perform necessary work, and maintaining a positive working culture at LIPA and a productive working relationship with the Service Provider
	Rate Design - Existing rate design may not reflect changing customer usage patterns/expectations or provide pricing signals and could result in economic inefficiencies and negative public perception
	Talent Management - Difficulty attracting/retaining individuals with the right knowledge, skillsets, and experience may impact the ability to achieve our purpose and objectives
People & Reputation	Call Center - Difficulty attracting and retaining call center personnel paired with increased call volume can result in longer hold times, decreased ability to effectively and efficiently interact with customers, and negative public perception
	Reputation - Negative media coverage could alter customer perception, system operations, and access to affordable capital

ERM BOARD POLICY REVIEW

- As part of a larger review of LIPA's board policies, the ERM Policy was reviewed and streamlined by the Board of Trustees
- As noted in the June discussion, the Program has made significant improvements since its inception in 2017 and maintains a goal of continuous improvement to promote best in class practices
- One of the most current improvements is increasing the number of formal ERM risk discussions with the Board to provide greater insights into high-priority risks
- The Policy changes were discussed in the June board meeting and notionally approved; we're seeking formal approval today
- Cyber deep dive to occur in December, additional quarterly deep dive discussions planned for 2024

THANK YOU!

FOR CONSIDERATION

September 27, 2023

TO: The Board of Trustees

FROM: Thomas Falcone

SUBJECT: Consideration of Approval of the Annual Report and Amendments on the Board's

Policy on Enterprise Risk Management

Requested Action

The Board of Trustees (the "Board") of the Long Island Power Authority ("LIPA") is requested to adopt a resolution: (i) finding that LIPA has complied with the Board Policy on Enterprise Risk Management (the "ERM Policy" or "Policy"); (ii) approving the annual report for the Policy; and (iii) approving amendments to the Policy, which Resolution is attached hereto as **Exhibit "A."**

Background

By Resolution No. 1351, dated March 29, 2017, the Board adopted the ERM Policy, focusing on the identification, assessment, management, and mitigation of risks. The Policy was last reviewed and amended by the Board in September 2022. The Finance and Audit Committee ("F&A Committee"), in its Charter, was delegated the responsibility for reviewing LIPA's practices relating to ERM. LIPA's Service Provider, PSEG Long Island, participates in the implementation of LIPA's ERM Program. Specifically, the Policy provides that "the Chief Executive Officer or his or her designee will report annually to the F&A Committee of the Board on the Policy, including: a review of the significant risks to LIPA's mission; and compliance with the key provisions of the Policy."

Compliance with the Policy

LIPA and PSEG Long Island have maintained an ERM program designed to evaluate significant risks and corresponding mitigation activities facing the business. This Report covers ERM activities from the Board's September 2022 review to the present. LIPA Staff recommends that, for the reasons set forth below, the Board find that LIPA has substantially complied with the objectives of the Policy for the period since the last annual report.

The Policy states: "Under the direction of LIPA's Chief Executive Officer, LIPA and its Service Provider shall maintain an Enterprise Risk Management Program with the following key provisions":

"LIPA and its Service Provider will strategically manage their respective risks to reduce the probability of significant outages, financial loss, health and safety events, and reputational harm."

 LIPA and PSEG Long Island have maintained an ERM program designed to evaluate significant risks and corresponding mitigation activities facing the business, including risks related to significant outages, financial loss, health and safety events, and reputational harm. As discussed below, LIPA has an active Enterprise Risk Management Committee that regularly discusses the most significant risks facing LIPA's and PSEG Long Island's objectives and operations. "LIPA will maintain an Enterprise Risk Management Committee ("ERMC") consisting of at least three staff appointed by the CEO, two of whom must be drawn from senior management, to oversee LIPA's Program and the activities of its Service Provider."

- LIPA has an active ERMC that reviews the progress and findings of the ERM Program, including discussions of the most significant risks facing LIPA and its Service Provider. Since the last annual report, the ERMC has met four times to discuss the various components of the Program, including the review of LIPA and the Service Provider's risk assessments and associated mitigation activities. In addition, it also reviewed the Service Provider's Annual Report and deep-dive analysis provided on select high-priority risks.
- Currently, there are nine members on the Committee, including the CEO/CFO, COO, General Counsel, and other LIPA Staff at the Senior Vice President, Vice President, and Director levels.

The ERMC maintains an ERM Procedures Manual, which includes the integration of risk information into decision-making within Strategic Planning, Internal Audit, and other areas of the business. The ERM Procedures Manual also calls for maintaining a list of emerging risks and recognizes the Service Provider's Risk Management Committee ("RMC"), which is responsible for managing their identified risks. "LIPA's Service Provider will maintain a Risk Management Committee to oversee their ERM Program, to identify, assess, monitor, and manage their most significant risks, and report on those risks to LIPA's ERMC."

- PSEG Long Island maintains a Risk Management Committee that oversees its ERM program which identifies, assesses, monitors, and reports on the most significant risks to LIPA's ERMC through the issuance of their ERM Annual Report.
- The PSEG Long Island Risk Management Committee meets approximately four times a year.

"LIPA and its Service Provider will perform an evaluation of their most significant risks and corresponding management activities and report them to the senior management of LIPA and its Service Provider for review and evaluation on an annual basis, with ongoing monitoring between reviews."

- Since the last Board report, the ERM teams have worked with Subject Matter Experts ("SMEs") to develop deep-dive analyses on selected significant risks to LIPA and PSEG Long Island to understand root causes, mitigations in place, and actions that could be taken to further mitigate these risks. A risk analysis was performed on the time-of-day implementation plan and presented to LIPA senior management. Currently, the ERM Teams are working on a deep dive related to the locate and mark risk that will be discussed with management of both LIPA and PSEG Long Island.
- The F&A Committee receives an annual update on the ERM Program highlighting the significant risks and mitigation actions facing LIPA and its Service Provider concurrent with this annual report. Over the course of the year, there are additional presentations to the Board that discuss significant risks, some of which include: major storm, cyber security, safety, physical security, the outdated primary transmission control center, rates, call center, and staffing.

"LIPA and its Service Provider will review LIPA's insurance and other forms of coverage against

insurable risks, including the availability and economics of such coverage, each year."

- The Second Amended & Restated Operations Services Agreement ("OSA") requires LIPA to provide written notification to its Service Provider regarding the renewal of required policies, desired changes in coverages, and any requests to investigate other types of coverages. The LIPA notification is sent each December.
- Since the last Board report, LIPA risk management and LIPA's Insurance Advisor provided oversight of the coverages placed by PSEG Long Island as required by the OSA to assure prudent and economic coverage placed to protect the interest of LIPA's bondholders and customer-owners. The policies included:
 - o Excess 3rd Party General Liability
 - o Property Insurance (all risks, excludes wires and poles) includes U.S. Property Terrorism
 - Cyber Insurance LIPA named insured on PSEG Long Island's Cyber Insurance
 - o Nuclear Electric Replacement for Nine Mile Point, Unit 2
- LIPA maintains its own insurance policies, including Director and Officer liability, premises general liability, and property insurance, as well as cyber event insurance and employee practices liability insurance.

"LIPA will conduct a biennial review of the maturity of the Program compared to industry best practices, which will be provided to the Board of Trustees, senior management, and LIPA's Internal Audit staff."

• The most recent ERM maturity assessment was conducted in August 2022 in alignment with the Board-approved biennial review cadence. The ERM Program improved in many areas, including the risk assessment process and reporting, and enhancing enterprise-wide risk management skills. The ERM Team has developed a roadmap that focuses on making improvements in areas such as integrating risk analysis into business processes, enhancing the emerging risk process, measuring the effectiveness of mitigation actions, improving risk awareness and accountability, and over the long term, incorporating risk analysis into strategic planning. LIPA's Internal Audit department received a copy of the 2022 ERM maturity assessment and diagnostic report prepared by a third-party vendor, which measures the current maturity of the LIPA ERM Program and compares it to an industry benchmark. In accordance with the Policy, the next maturity assessment will be conducted in August 2024.

Annual Review of the Policy

The Board hired Leading Resources, Inc. to review the Board policies and facilitate discussion amongst the Trustees on amending certain policies. A working group of Trustees participated in various meetings to develop and draft amendments to the Policy. The draft amendments to the Policy have been shared with the entire Board. The final version of the amended Policy, as drafted by the Trustees, is attached hereto as **Exhibit "B."**

Recommendation

Based upon the foregoing, I recommend approval of the above requested action by adoption of a resolution in the form attached hereto.

Board Policy: Enterprise Risk Management

Policy Type: **Operating**

Monitored by: Finance and Audit Committee

Board Resolution: #1351, approved March 29, 2017

#1428, amended September 27, 2018 #1492, amended September 25, 2019 #1572, amended December 16, 2020 #xxxx, amended September xx, 2023

Board Policy on Enterprise Risk Management

The Long Island Power Authority's ("LIPA") vision for Enterprise Risk Management ("ERM") is to maintain an industry leading program that identifies, assesses, and monitors significant risks to achieving LIPA's purpose and vision and the Board's objectives as stated in each policy.

LIPA shall maintain an ERM program¹ with the following key provisions:

- Strategically manage or oversee risks to reduce the probability of significant outages, financial loss, health and safety events, reputational harm, and failure to achieve the Board Policy objectives.
- Create an Enterprise Risk Management Committee ("ERMC"), which Committee members will be appointed at the discretion of LIPA's Chief Executive Officer. LIPA's service provider will maintain a Risk Management Committee to oversee those risks and report to LIPA's ERMC.²
- Perform an evaluation of its most significant risks and corresponding management activities.

LIPA's Chief Executive Officer or his or her designee will report annually to the Finance and Audit Committee of the Board on: (i) compliance with the key provisions of the Policy, including the results of a biennial review of the maturity of the program compared to industry best practices; and (ii) review of the significant risks to LIPA's purpose and vision.

¹ Section 4.2(5)(q)(i) of the Seconded Amended and Restated Operations Services Agreement ("2nd Amended and Restated OSA") requires that the Service Provider be responsible for "maintaining a comprehensive Enterprise Risk Management ("ERM") Program ("ERM Program") to identify, assess, monitor, and report on the Service Provider's most significant risks to the organization in accordance with the prevailing LIPA Board policy on Enterprise Risk Management."

² Section 4.2(5)(q)(vi) of the 2nd Amended and Restated OSA requires that the Service Provider be responsible for "establishing and maintaining a Risk Management Committee to oversee the Service Provider's ERM Program, including but not limited to, the risk assessment process, deep dives, risk escalation, and reporting on the most significant risks to LIPA's management team."
