One audit observation was closed since the September 27, 2023, F&A Committee meeting.

All Management Action plan items are independently verified and validated by Internal Audit prior to closure.

APPENDIX A: AUDIT & ACTION PLAN STATUS DESCRIPTIONS

APPENDIX A: AUDIT & ACTION PLAN STATUS DESCRIPTIONS

Audit Observation Ranking	Description
Low risk	Generally, controls evaluated are adequate, appropriate, and effective to provide reasonable assurance that risks are being managed and objectives will be met. The observations primarily represent opportunities for improvement or issues with low impact on business activities or the ability to effectively provide our customers with clean, reliable, and affordable energy. Routine Management attention is warranted.
Moderate risk	Controls evaluated are unlikely to provide reasonable assurance that risks are being managed and objectives will be met; however, the overall effects on business activities or the ability to effectively provide our customers with clean, reliable, and affordable energy are deemed to be less damaging than observations rated as high risk. Timely Management attention is warranted.
High risk	Controls evaluated are not adequate, appropriate, or effective to provide reasonable assurance that risks are being managed and objectives will be met. These observations may have a significant adverse impact on business activities or the ability to effectively provide our customers with clean, reliable, and affordable energy. Immediate Management attention is required.

Note: Previous Audit Report Opinions have been Eliminated starting January 1, 2023
