Re: Quarterly Report on Interest Rate Exchange Agreements  
 Quarter Ended September 30, 2024

Dear Finance & Audit Committee Members:

The Long Island Power Authority (“the Authority or LIPA”) is filing this report pursuant to reporting requirements outlined in the Comprehensive Guidelines for the Use of Interest Rate Exchange Agreements, as approved by the Board of Trustees on March 29, 2017.

Description of the Interest Rate Exchange Agreements

As of September 30, 2024, LIPA had the following interest rate swap agreements outstanding:

Counterparty	Type of Swap	Notional Outstanding (\$000)	Effective Date	Maturity Date
UBS AG	Floating-to-Fixed	\$587,225	6/1/2003	12/1/2029
Citibank, N.A.	Floating-to-Fixed	\$251,510	9/1/2022	9/1/2042

As of September 30, 2024, the estimated total mark-to-market value of the transactions was approximately negative \$42 million (please see Appendix A). The mark-to-market value excludes transaction costs and is calculated at prevailing mid-market rates. Therefore, it represents the hypothetical amount that LIPA would owe to the counterparties if the transactions were terminated on that date, absent transaction costs.

Counterparty Ratings

As of September 30, 2024, the Authority’s counterparties had the following ratings and outlooks:

Counterparty	Moody’s		S&P		Fitch	
	Rating	Outlook	Rating	Outlook	Rating	Outlook
UBS AG	Aa2	Negative	A+	Stable	A+	Stable
Citibank, N.A.	Aa3	Stable	A+	Stable	A+	Stable

Risks

The Authority is subject to certain risks under its interest rate swap transactions, including:

Counterparty Risk: the risk that a counterparty (or its guarantor) will fail to make a payment or default under the swap agreement and LIPA will lose the benefit of the hedge. If a counterparty were to default under its agreement when owing a termination payment to LIPA, LIPA may have

to pay another entity to assume the position of the defaulting counterparty. The swap agreements contain various termination events and collateral posting provisions to mitigate counterparty risk for lower-rated entities (see Appendix B).

**Termination Risk:** the risk that a counterparty will terminate a swap with LIPA owing a termination payment. Only LIPA is entitled to terminate these transactions from time-to-time for any reason at market. In addition, LIPA has the right to terminate the swap with Citibank at par on any fixed rate payer period end date beginning September 1, 2027, which mitigates the termination risk that LIPA has with Citibank. The counterparties may only terminate upon the occurrence of certain events such as payment defaults, other defaults which remain uncured for 30 days after notice, the bankruptcy or insolvency of LIPA (or similar events), certain downgrades of LIPA’s and a swap insurer’s (if any) credit rating, and events related to the underlying bonds. As of September 30, 2024, the credit ratings of LIPA and its swap insurer were as follows:

Entity	Moody’s		S&P		Fitch	
	Rating	Outlook	Rating	Outlook	Rating	Outlook
LIPA	A2	Stable	A	Stable	A+	Stable
Assured Guaranty Inc. <sup>1</sup>	A1	Stable	AA	Stable	-	-

<sup>1</sup>Insurer on swap with UBS.

**Collateral Posting Risk:** the risk that LIPA will be required to post collateral to its counterparties to secure a negative mark-to-market valuation. There are currently no Credit Support Annexes (CSAs) in place with either dealer; therefore, there are no collateral requirements at this time under any rating level. A CSA may be executed to cure a rating downgrade termination event (noted in Appendix B).

**Basis Risk:** the risk of a mismatch in the variable rates paid and received by LIPA.

Under the floating-to-fixed swaps with UBS and Citi, LIPA is subject to the risk that the variable-rates received (69.47% SOFR + 0.0795% for UBS swap, and 70% SOFR + 0.0801% for Citi swap) may be different than the rate payable on any variable-rate refunding bonds.

The Authority views basis risk as a limited form of variable-rate exposure, and therefore takes Basis Risk into account when analyzing outstanding interest rate exposure.
