**LIPA and PSEG Long Island Launch Public Engagement Process
for 2027 Integrated Resource Plan**

Public invited to comment on draft scope and planning scenarios

UNIONDALE, NY, May 20, 2026 - The Long Island Power Authority (LIPA) and PSEG Long Island today announced the launch of the first phase of public engagement for the 2027 Integrated Resource Plan (IRP), a comprehensive planning effort that will evaluate how Long Island and the Rockaways can continue to receive reliable, affordable, and increasingly clean energy in the years ahead. Public comments on the draft scope and planning scenarios will be accepted through June 30, 2026.

LIPA and PSEG Long Island have launched a new website, LIResourcePlan.com, where customers, stakeholders, and interested members of the public can access information on the IRP process, including the project's scope, the contributing factors that will be considered during the planning process, and the planning scenarios being evaluated.

The study will examine a broad range of factors impacting the electric system over the coming years, including electric demand growth, system reliability, affordability, transmission needs, generation resources, clean energy goals, emerging technologies, and changing regulatory requirements. The IRP covers a 13-year planning horizon from 2027 through 2039 and is expected to conclude in summer 2027.

"The Integrated Resource Plan is one of the most important long-term planning tools we have to help ensure Long Island's electric system remains reliable, affordable, and increasingly clean," said Gary Stephenson, LIPA's Senior Vice President of Power Supply. "As the energy landscape continues to evolve, this process will help inform long-term decisions about the investments and resources needed to serve our customers and communities."

"The Integrated Resource Plan will help determine how we can continue to meet Long Island's future energy needs reliably, affordably and sustainably under evolving system conditions," said Curt Dahl, PSEG Long Island's Vice President of Power System Management. "Public participation is a critical part of the process, and the feedback we receive during this initial phase will help inform the planning assumptions, priorities, and scenarios evaluated as part of the study."

Public comments on the draft scope and planning scenarios will be accepted through **June 30, 2026**. Comments and questions may be submitted through the website or by email to comments@LIResourcePlan.com. Additional opportunities for public comment will be provided later in the IRP process.

PSEG LONG ISLAND

LIPA and PSEG Long Island will also host public comment sessions in Nassau County, Suffolk County, and the Rockaways to provide additional opportunities for stakeholder and community input on the following dates and times:

Rockaways In-Person Public Comment Session

June 16, 2026, 5:30 p.m.
Rockaway YMCA, Conference Room
207 Beach 73rd Street, Arverne, NY 11692

Suffolk County In-Person Public Comment Session

June 17, 2026, 9:30 a.m.
H. Lee Dennison Building, Room 182
100 Veterans Memorial Highway, Hauppauge, NY 11788

Nassau County In-Person and Virtual Public Comment Session

June 17, 2026, 6:00 p.m.
333 Earle Ovington Blvd., 4th Floor, Uniondale, NY 11553

About LIPA

The Long Island Power Authority is a non-profit municipal electric provider that owns the electric transmission and distribution system serving approximately 1.2 million customers across Long Island and the Rockaways.

About PSEG Long Island

PSEG Long Island operates the Long Island Power Authority's transmission and distribution system under a long-term contract and is responsible for the day-to-day operation, maintenance, and management of the system serving Long Island and the Rockaways.. PSEG Long Island is a subsidiary of Public Service Enterprise Group Inc. (PSEG) (NYSE:PEG), a publicly traded diversified energy company.
